Aathyanth Lekshman Prabu Krishna Veni

College Park, MD | 667-231-1853 | alekshman@terpmail.umd.edu | linkedin.com/in/aathyanth-lekshman | github.com/ALPKV

Education

University of Maryland, College Park — College Park, MD
B.S. in Computer Engineering; ACES Cybersecurity Honors Program — Expected May 2029
Senator Katie Fry Hester Scholarship; District 4B House of Delegates Scholarship
Relevant Coursework: ENEE 290 (Differential Equations & Linear Algebra), ENES 100 (Engineering Design), CMSC 131 (OOP in Java), HACS 100 (Cybersecurity Foundations - UNIX), CHEM 135 (Engineering Chemistry)

Technical Skills

Languages: Python, C++, C, Java, JavaScript, TypeScript, MATLAB
Web & Data: React, HTML, CSS, pandas, NumPy, scikit-learn
Tools & Engineering: Git, GitHub, GitHub Actions, Linux/Unix, FFmpeg, VEX Robotics, Fusion 360, Autodesk Inventor

Technical Projects

Automatic Video Clipper | Python, FFmpeg

- Built a Python and FFmpeg pipeline to detect cricket deliveries and generate video clips automatically, processing each practice session in under 3 minutes.
- Implemented an audio peak-detection algorithm to identify ball impacts amid background noise and generate clip timestamps without manual annotation.

Semi-Autonomous BattleBot | C++, VEX Robotics

- Developed C++ robot control software for autonomous and driver-controlled operation, integrating sensor-based obstacle detection and manual override.
- Tested and debugged control logic across 10+ competitive matches; refined autonomous routines and driver controls through iterative testing.

Cricket Delivery Data Analysis | Python, pandas, scikit-learn

- Cleaned and analyzed 17,848 Hawk-Eye-tracked IPL deliveries using Python and pandas; grouped leg-spin deliveries into five pitching-length zones.
- Trained a linear regression model to explore length and scoring; Identified a bowling placement associated with 0.82 fewer opponent runs per ball compared with shorter deliveries, highlighting a potential strategy to limit scoring.

Experience

Coding Instructor — Mar. 2026 – Present
Code Ninjas — Ellicott City, MD

- Teach Python, JavaScript, and Microsoft MakeCode to 20+ students ages 7–16 through projects covering loops, conditionals, and programming fundamentals.
- Adapt programming exercises and project complexity to individual skill levels.

UX Intern — Jun. 2025 – Aug. 2025
PathSpark — College Park, MD

- Evaluated user interface layouts and navigation across an EdTech platform; presented user experience (UX) recommendations to the product team to address usability issues.

Technical Editor — Sep. 2024 – Jan. 2026
3B Sport — Remote

- Generated 50K+ impressions, produced social media campaign content with professional U.S. cricketers; used Google Analytics engagement data to guide content decisions.

Private Mathematics Tutor — Sep. 2025 – Jun. 2026
Self-Employed — Ellicott City, MD

- Taught trigonometry to 9th and 10th grade students, adapting individual lesson plans through diagnostic assessments and weekly progress reviews.

Environmental Research Intern — Mar. 2025 – Jun. 2025
Climate Ecology Institute — Remote

- Synthesized 15+ sources into climate resilience and land-use feasibility analyses; contributed design recommendations to the final project proposal.

Leadership & Activities

- **App Dev Club, UMD – Web Development Bootcamp:** Selected for the 30-person bootcamp from the club's large applicant pool; training in Git/GitHub, HTML/CSS, React, FastAPI, MongoDB, DevOps, system design, and AI tools.
- **Professional Cricketer, Fort Lauderdale Lions:** Compete on the main team in Minor League Cricket, balancing high-level training, travel, and match preparation with full-time engineering studies.
- **Founder & President, MHHS Cricket Club:** Built a 40+ member club, organized weekly practices, and established partnerships with two regional cricket organizations.
